Digital CV

CAREER OBJECTIVE

A dedicated Electronic Systems candidate eager to apply classroom knowledge to real-world engineering challenges. Brings a strong understanding of electronic systems, including analog and digital circuit design, component testing, and circuit troubleshooting. Also equipped with basic programming knowledge in C and Python for hardware integration. Currently, I am actively seeking an internship in the semiconductor field to develop my practical skills, solve technical problems, and support the team's daily operations.

EDUCATION

Universiti Malaysia Perlis (OCT 2024 – OCT 2028)

Bachelor's Degree of Electronic Engineering Technology (Electronic System)

Academic Awards: Recipient of Dean's List for all semesters in Degree (Semester 1 - Semester 5)

CGPA : 3.79 (Semester 1 - Semester 5)

Kolej Vokasional Seri Iskandar (Jan 2019 - Oct 2024)

Diploma Vokasional Malaysia (Teknologi Elektronik)

CGPA : 3.72

Sijil Kemahiran Malaysia (SKM TAHAP 3)

Electronic Equipment Troubleshooting, Repair & Maintenance - Level 3

New Certificate Numbering System : **S102712913**

Sijil Vokasional Malaysia (Teknologi Elektronik)

PNGK Akedemik : 3.48

PNGK Vokasional : 3.93

PNGK Keseluruhan : 3.71

WORK EXPERIENCE

Mobile Phone Technician - GEEKFIX Repair Phone Seri Iskandar (2024)

- Diagnosed customer phone using suitable equipment and find the best solution for customer

- Carry out repair depend on the damage and customer agreement

VOLUNTEER EXPERIENCE

Judging Committee Volunteers (Engineering Technology Category) for ProgramIntegratedDesignSmart System Challenge (IDSSC) 2026

- Facilitated evaluation processes for industry judges to ensure smooth program execution.

- Make sure the judge evaluate all the participant equally with the same time limit

Community Services at Masjid Lama Bota Kanan

- Engaged in teamwork-driven community service to clean and revive the mosque

- Strengthening bonds with the local community

SKILLS

Professional Skills: Systematic Debugging, Technical Documentation, Time Management, Discipline, Teamwork

Technical Skills: Analog & Digital Electronics, Hardware Troubleshooting, Circuit Testing & Instrumentation (Oscilloscope, DMM), PCB Design & Soldering, C, Python, EDA Simulation Tools (LTspice/Multisim), Semiconductor Fundamentals

Soft Skills: Problem Solving, Critical Thinking, Adaptability & Independence, Active Learning, Collaboration

Language: Bahasa Malaysia (Native), English (Fluent)
